MosaicColorPress

Color-by-number books from your own photos.

Each photo was reduced to a numbered mosaic grid. Color each cell with the color of its number from the key on the following page. Every page was recounted cell by cell against the source photo before printing: the key covers every number used, and the counts always add up to the full grid.

1 photos, 1452 cells in total.

Page 1 -- sample_photo.png

44x33 grid, 16 colors -- recounted and verified
